

Practice Lab 5:

Section D11

Dated: 25-june-2023

Time: 06:10pm- 11:59 pm

- *Upload MS word (.docx) or (.pdf) file on the portal with screen shots of output tables and queries should be written in the text form.*
- *Name and Registration number should be there on each page header.*
- *Only one submission will be accepted. Don't submit multiple files while submitting.*

Create a table called "Employee" with the following columns and insert 5 rows at least

- "id": An integer column with the AUTO_INCREMENT attribute, which serves as the primary key.
- "name": A variable-length string column that can hold up to 50 characters.
- "age": An integer column to store the age of the person.
- "email": A variable-length string column to store the email address, limited to 100 characters.

By Using Store Procedure:

Question 01: SELECT name and age from Employee Table

Question 02: Pass one parameter "id" of the employee having id = 4.

Question 03: Print the Record of employee by passing two parameters "id" and "name".
