Introduction to Database Systems-LAB CL-102 (Section D11)   **Time: 9:35-10:20**

TASK 1

Primary key

Foreign key

Create table city

cid	City_name
1	Multan
2	Karachi
3	Lahore

Create table student

id	name	email	City_id
1	Ali	abc@gmail.com	1
2	Ahmad	jkl@gmail.com	1
3	Majid	123@gmail.com	2
4	Waseem	hyt@gmail.com	3

create table city1(

cid int not null unique auto_increment,

city_Name varchar(20),

primary key(cid)

)

insert into city1(city_Name)

values('Multa');

create table studentrecod(

id int not null unique auto_increment,

name varchar(100),

email varchar(100),

city_id int,

```sql
primary key(id),

foreign key(city_id) references city(cid)

)

insert into studentrecod(name,email,city_id)

values('Ali','abc@gmail.com',1);
```
